Judicious and creative when crafting effective websites, apps and platforms to propel competitive advantage and revenue growth. Technically proficient and analytical problem solver with calm and focused demeanor.

SKILLS

- Software Development
- Stack Development
- MERN Stack
- Web-based software engineering
- Engineering abilities
- Web site design using React Framework

- Programming Languages: JavaScript, HTML5, CSS3, Python(Basic)
- Front-End Technologies: React.js, Bootstrap, Material UI
- Back-End Technologies: Node.js, Express.js, MongoDB, RESTful APIs
- Tools and Platforms: Git, GitHub, NPM, Thunder Client
- Cloud: AWS - EC2, S3, Security groups, Elastic Load Balancer

WORK HISTORY

Full Stack Developer | Zensar Technologies - Bengaluru
05/2021 - CURRENT

- Extensive Experience in understanding Business Requirements, Functional Specifications.
- Responsible for creating database architecture using MongoDB.
- Worked on Payment integration with Braintree payment gateway.
- Performed unit testing on the application.
- Developed Web application using React framework.
- Implement backend RESTful APIs using Nodejs and Express Framework
- Used Javascript, NOSQL and HTML to develop app-solutions.
- Reviewed code, debugged problems, and corrected issues.
- Worked with back-end developers to design APIs.
- Created proofs of concept for innovative new solutions.
- Extensive Experience in understanding Business Requirements, Functional Specifications.
- Developed end to end POC on Grocery web application using all tech stack required for frontend and backend.
- Implemented robust authentication mechanism using JSON Web Token (JWT).
- Implemented RESTful APIs to integrate front-end and back-end functionalities.
- Developed software for desktop and mobile operating systems.
- Develop back-end components to improve responsiveness and overall performance.

- Developed Web applications and RESTful apis using python and FastAPI.
- Collaborated with cross-functional teams, including designers, to create user-friendly and visually appealing interfaces.
- Designed and implemented RESTful APIs to facilitate data exchange between the front-end and back-end systems.
- Utilized [list databases, e.g., MySQL, MongoDB, etc.] to store and retrieve data efficiently.
- Implemented authentication and authorization mechanisms to ensure data security and user access control.
- Created backend workflows and features according to feature requirements.
- Created backend workflows and features according to feature requirements.
- Conducted code reviews, provided mentoring to junior developers, and contributed to a culture of best practices and continuous improvement.
- Assisted in project planning and estimations, ensuring on-time delivery of milestones and projects.
- Collaborated with the QA team to identify and resolve bugs and issues, ensuring a high-quality product.
- Conducted A/B testing and analyzed user data to make data-driven decisions for feature enhancements.
